CRISIL COMPLEXITY LEVELS

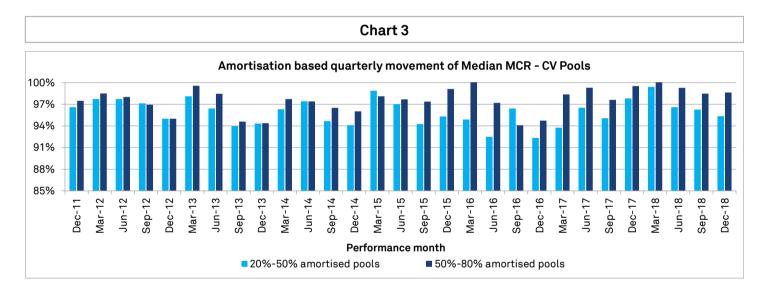

CRISIL assigns complexity levels to various types of financial instruments on a voluntary basis. This is a pro-bono exercise aimed at strengthening Indian capital markets through greater transparency. CRISIL Complexity Levels reflect the ease of understanding and analysing the risk elements in these instruments and allow investors to gauge the level of sophistication and due diligence required before investing in any financial product. Instruments are classified into three categories: simple, complex, and highly complex. This is done using four parameters: ease of calculation of payout and returns, clarity on timing of cash flows, number of counterparties involved in the transaction, and familiarity of market participants with the instrument. Complexity is distinct from risk: saying that an instrument is simple is not to say that it is less risky, but the risk will be easier to understand in a simple instrument than in a complex one. Accordingly, the complexity level applicable to PTC instrument / direct assignment indicated in the above report is 'Highly Complex'.

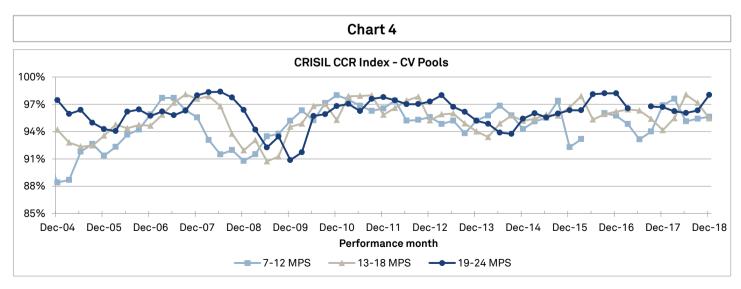

Investors can refer to http://crisil.com/ratings/crisil-complexity-levels-of-financial-instruments.html for more details and a comprehensive list of CRISIL Complexity Levels or call the Customer Service Helpdesk Toll free number: 1800 267 1301.

Commercial Mortgage-backed Securities (CMBS) Ratings

CRISIL has outstanding ratings on two transactions under CMBS as per the table below. As of December 2018, the payout confirmation for both transactions has been received.

Sr. no	Issuer	Amount (Rs. Million)	Instrument details	Current Rating/ Credit Opinion
1	DLF Emporio Limited	5250.0	NCDs	CRISIL AA (SO)/Stable
2	DLF Promenade Limited	3750.0	NCDs	CRISIL AA (SO)/Stable

Glossary of Terms Used

Originator: The bank or finance company that has originated the pool of receivables.

Pool principal: The sum of principal outstanding for all loans present in the pool at the time of securitisation.

Pool cashflows: The sum of principal and interest outstanding for all loans present in the pool at the time of securitisation.

Investor payouts: The sum of expected principal and interest obligations towards the PTC holders or the acquirer at the time of securitisation.

Structure: Structure of a transaction can either be at par or at a premium, depending on whether the pool principal is sold at par or at a premium to investors. Other structural features present in the transaction are appropriately mentioned, for example par with turbo amortisation, par with Excess interest spread (EIS), par with trapped EIS, par with interest only (IO) strips, etc.

Asset class: The asset(s) that back the securitised receivables.

Asset type: The proportion of new and used assets in the pool at the time of securitisation.

Pool duration: The weighted average balance maturity of cashflows in months. Pool cashflows are taken as weights for the purpose of calculating the average. In Mortgage-backed securities (MBS) transactions, principal amounts are used as weights.

Weighted average seasoning (WAS): Indicates the weighted average seasoning (in months) of the pool at the time of securitisation.

Weighted average loan-to-value ratio (WAL): The weighted average loan to value (LTV) ratio of the pool at the time of securitisation.

Weighted average yield (WAY): The pool yield at the time of securitisation.

Average yield: The current pool yield, calculated as the internal rate of return (IRR) of the pool cash flows.

Overdue composition: Indicates the proportion of cashflows pertaining to current contracts, one-month overdue contracts and so on at the time of securitisation.

Weighted average residual maturity (WAM): The weighted average balance maturity of the instrument in months. Monthly payouts to investors are taken as weights for the purpose of calculating the average.

Credit collateral as % of pool cashflows: The credit collateral stipulated at the time of securitisation as a percentage of future pool cashflows. In case of MBS transactions, the credit collateral is expressed as a percentage of pool principal.

First loss facility as % of pool cashflows: The first loss credit facility stipulated at the time of securitisation as a percentage of total pool cashflows. In case of MBS transactions, the first loss credit facility is expressed as a percentage of pool principal.

Second loss facility as % of pool cashflows: The second loss credit facilty stipulated at the time of securitisation as a percentage of total pool cashflows. In case of MBS transactions, the second loss credit facility is expressed as a percentage of pool principal.

Liquidity facility as % of pool cashflows: Indicates the liquidity support available to the transaction, expressed as a percentage of pool cashflows. Some transactions also have an advance payment mechanism, wherein monthly payouts are funded by the liquidity facility, which will be reflected in a high level of utilisation of liquidity facility. In case of MBS transactions, the liquidity facility is expressed as a percentage of pool principal.

Scheduled EIS as % of Initial pool cashflows: The embedded cushion available in a transaction on account of the differential between the pool yield and pass-through rate. This is only available in par structures and is expressed as a percentage of the pool cashflows. However, in a few structures, this cushion is diluted as the spread is utilised to make certain payouts like charge-offs, servicing fees, fees to liquidity provider etc. In such cases the actual cushion available to investors due to EIS may be lower than the amount stated herein. In case of MBS transactions, the EIS is expressed as a percentage of pool principal.

Subordinated cashflows as % of pool cashflows: In certain transactions, the initial pool cash flows are higher than the total payouts promised to the investors. This could be on account of either over-collateralisation (initial pool principal being higher than the principal payouts promised to the investors) or EIS (pool yield being higher than the investor yield). The subordinated cash flows are computed as the difference between the initial pool cash flows and the total payouts promised to the investors expressed as a percentage of initial pool cash flows. In case of transactions structured at par with EIS (either flow-back or trapped), the credit support available in the form of subordinated EIS is reported under Scheduled EIS. However, in case of transactions having over-collateral and in case of transactions structured at par with turbo amortisation (wherein excess cash flows from the pool are used to prepay the investor's principal), the credit support available in the form of subordinated cash flows is reported in this section.

Current rating/credit opinion: The current rating assigned by CRISIL to pass-through certificates (PTCs) issued by the SPV, or the opinion provided by CRISIL on the credit profile of the acquirer payouts in transactions under the assignment of receivables programme. The ratings/credit opinions mentioned represent CRISIL's view on the transactions as on March 31, 2019.

Months post securitisation (MPS): The number of payouts elapsed since securitisation

Pool amortisation: The amortised pool principal, as a percentage of pool principal at the time of securitisation.

Cumulative collection ratio (CCR): The ratio of total collections till date to total billings till date. These billings include initial overdues in the pool at the time of securitisation except in cases where these overdues are not subordinated. In such cases, the CCR will be understated to that extent in comparison with other pools.

3 month average monthly collection ratio (MCR): The average of the ratio of monthly collections to monthly billings for the last 3 months. These billings and collections do not include prepayments.

Total Collection Efficiency (TCE): The ratio of monthly collections to monthly billings inclusive of overdue billings. These billings and collections do not include prepayments.

Cumulative prepayments: The ratio of cumulative prepayments (including partial prepayments, wherever available) in a pool to the pool principal at the time of securitisation.

90+ delinquencies: The unamortised principal plus the overdues on contracts delinquent for more than 90 days plus loss on sale of repossessed assets (wherever available) as a percentage of pool principal at the time of securitisation.

180+ delinquencies: The unamortised principal plus the overdues on contracts delinquent for more than 180 days plus loss on sale of repossessed assets (wherever available) as a percentage of pool principal at the time of securitisation.

1+ overdues: The total overdues in the pool plus loss on sale of repossessed assets (wherever available) as a percentage of pool principal at the time of securitisation.

90+ overdues: The overdues on contracts delinquent for more than 90 days plus loss on sale of repossessed assets (wherever available) as a percentage of pool principal at the time of securitisation.

Loss on repossession and sale: Cumulative loss/profit on sale of repossessed asset expressed as a percentage of pool principal at the time of securitisation.

Credit collateral utilisation: The cumulative credit collateral utilised as a percentage of credit collateral stipulated at the time of initial rating. In case of transactions that have witnessed reset of credit collateral, the utilisation is expressed as a percentage of credit collateral available in the transaction subsequent to reset.

Current credit collateral as % of future payouts: The credit collateral outstanding outstanding as a percentage of future investor payouts. In case of MBS transactions, the credit collateral is expressed as a percentage of pool principal.

EIS as % of future payouts: The EIS outstanding as a percentage of future investor payouts. In case of MBS transactions, the credit collateral is expressed as a percentage of pool principal.

Threshold collection ratio (TCR): The minimum cumulative collection ratio required on a pool's future cash flows, to be able to service the investor payouts on time. The lower the TCR, the lesser will be the degree of credit risk in the pool.

Threshold credit coverage (TCC): TCC represents the ratio of threshold credit loss in a pool (1-TCR) to the actual credit loss as on date, as indicated by the number of contracts/principal outstanding in respect of contracts overdue for more than 180 days (excluding charged off contracts).

Abbreviations used

Acronym	Description
CE	Construction equipment
CV	Commercial vehicle
HCV	Heavy commercial vehicle
Ю	Interest only strip
LCV	Light commercial vehicle

CRISIL Rating Scale for Long-term Structured Finance Instruments

CRISIL AAA (SO)	Instruments with this rating are considered to have the highest degree of safety regarding timely servicing of
(Highest Safety)	financial obligations. Such instruments carry lowest credit risk.
CRISIL AA (SO)	Instruments with this rating are considered to have high degree of safety regarding timely servicing of financial
(High Safety)	obligations. Such instruments carry very low credit risk.
CRISIL A (SO)	Instruments with this rating are considered to have adequate degree of safety regarding timely servicing of
(Adequate Safety)	financial obligations. Such instruments carry low credit risk.
CRISIL BBB (SO)	Instruments with this rating are considered to have moderate degree of safety regarding timely servicing of
(Moderate Safety)	financial obligations. Such instruments carry moderate credit risk.
CRISIL BB (SO)	Instruments with this rating are considered to have moderate risk of default regarding timely servicing of financial
(Moderate Risk)	obligations.
CRISIL B (SO)	Instruments with this rating are considered to have high risk of default regarding timely servicing of financial
(High Risk)	obligations.
CRISIL C (SO)	Instruments with this rating are considered to have very high likelihood of default regarding timely payment of
(Very High Risk)	financial obligations.
CRISIL D (SO)	
(Default)	Instruments with this rating are in default or are expected to be in default soon.

Note:

- 1. CRISIL may apply '+' (plus) or '-' (minus) signs for ratings from 'CRISIL AA (SO)' to 'CRISIL C (SO)' to reflect comparative standing within the category.
- 2. CRISIL may assign rating outlooks for ratings from 'CRISIL AAA (SO)' to 'CRISIL B (SO)'. Ratings on Rating Watch will not carry outlooks. A rating outlook indicates the direction in which a rating may move over a medium-term horizon of one to two years. A rating outlook can be 'Positive', 'Stable', or 'Negative'. A 'Positive' or 'Negative' rating outlook is not necessarily a precursor of a rating change.
 - CRISIL may place an outstanding rating on Rating Watch if the issuer announces a merger or acquisition, or de-merger of some business that may impact the credit profile of the rated debt instrument. Ratings may also be placed on watch if the issuer's credit profile is impacted on account of an action by regulators, or when the impact of specific events on the credit profile cannot be accurately assessed at the point when they occur, and additional information may be necessary for CRISIL to fully ascertain the creditworthiness of the rated instrument. CRISIL may place a rating on watch, with positive, negative or developing implications. A listing under rating watch does not imply that a rating will necessarily change, nor is it a prerequisite for rating change.
- 3. A suffix of 'r' indicates investments carrying non-credit risk. The 'r' suffix indicates that payments on the rated instrument have significant risks other than credit risk. The terms of the instrument specify that the payments to investors will not be fixed, and could be linked to one or more external variables such as commodity prices, equity indices, or foreign exchange rates. This could result in variability in payments, including possible material loss of principal, because of adverse movement in value of the external variables. The risk of such adverse movement in price/value is not addressed by the rating.
- 4. CRISIL may assign a rating of 'NM' (Not Meaningful) to instruments that have factors present in them, which render the outstanding rating meaningless. These include reorganisation or liquidation of the issuer, the obligation being under dispute in a court of law or before a statutory authority.
- 5. A prefix of 'PP-MLD' indicates that the instrument is a principal-protected market-linked debenture. The terms of such instruments indicate that while the issuer promises to pay back the face value/principal of the instrument, the coupon rates of these instruments will not be fixed, and could be linked to one or more external variables such as commodity prices, equity share prices, indices, or foreign exchange rates.

CRISIL Performance Report

A prefix of 'Provisional' indicates that the rating centrally factors in the completion of certain critical steps/documentation

by the issuer for the instrument, without these the rating would either have been different or not assigned ab initio.

CRISIL Rating Scale for Short-term Structured Finance Instruments

CRISIL A1 (SO)	Instruments with this rating are considered to have very strong degree of safety regarding timely payment of financial obligation. Such instruments carry the lowest credit risk.
CRISIL A2 (SO)	Instruments with this rating are considered to have strong degree of safety regarding timely payment of financial obligation. Such instruments carry low credit risk.
CRISIL A3 (SO)	Instruments with this rating are considered to have moderate degree of safety regarding timely payment of financial obligation. Such instruments carry higher credit risk as compared to instruments rated in the two higher categories.
CRISIL A4 (SO)	Instruments with this rating are considered to have minimal degree of safety regarding timely payment of financial obligation. Such instruments carry very high credit risk and are susceptible to default.
CRISIL D (SO)	Instruments with this rating are in default or expected to be in default on maturity.

Note:

- 1. CRISIL may apply '+' (plus) sign for ratings from 'CRISIL A1 (S0)' to 'CRISIL A4 (S0)' to reflect comparative standing within the category.
- 2. A suffix of 'r' indicates investments carrying non-credit risk. The 'r' suffix indicates that payments on the rated instrument have significant risks other than credit risk. The terms of the instrument specify that the payments to investors will not be fixed, and could be linked to one or more external variables such as commodity prices, equity indices, or foreign exchange rates. This could result in variability in payments, including possible material loss of principal, because of adverse movements in value of the external variables. The risk of such adverse movements in price/value is not addressed by the rating.
- 3. CRISIL may assign a rating of 'NM' (Not Meaningful) to instruments that have factors present in them, which render the outstanding rating meaningless. These include reorganisation or liquidation of the issuer, the obligation being under dispute in a court of law or before a statutory authority.
- 4. A prefix of 'PP-MLD' indicates that the instrument is a principal-protected market-linked debenture. The terms of such instruments indicate that while the issuer promises to pay back the face value/principal of the instrument, the coupon rates of these instruments will not be fixed, and could be linked to one or more external variables such as commodity prices, equity share prices, indices, or foreign exchange rates.
- 5. A prefix of 'Provisional' indicates that the rating centrally factors in the completion of certain critical steps/documentation by the issuer for the instrument, without these the rating would either have been different or not assigned ab initio.

- First INFRA EL rating under the new credit rating system for infrastructure projects 2017

About CRISIL Limited

CRISIL is a global, agile and innovative analytics company driven by its mission of making markets function better. We are India's foremost provider of ratings, data, research, analytics and solutions. A strong track record of growth, culture of innovation and global footprint sets us apart. We have delivered independent opinions, actionable insights, and efficient solutions to over 100.000 customers.

We are majority owned by S&P Global Inc., a leading provider of transparent and independent ratings, benchmarks, analytics and data to the capital and commodity markets worldwide.

About Ratings

CRISIL Ratings is part of CRISIL Limited ("CRISIL"). We pioneered the concept of credit rating in India in 1987. CRISIL is registered in India as a credit rating agency with the Securities and Exchange Board of India ("SEBI"). With a tradition of independence, analytical rigour and innovation, CRISIL sets the standards in the credit rating business. We rate the entire range of debt instruments, such as, bank loans, certificates of deposit, commercial paper, non-convertible / convertible / partially convertible bonds and debentures, perpetual bonds, bank hybrid capital instruments, asset-backed and mortgage-backed securities, partial guarantees and other structured debt instruments. We have rated over 24,500 large and mid-scale corporates and financial institutions. CRISIL has also instituted several innovations in India in the rating business, including rating municipal bonds, partially guaranteed instruments and microfinance institutions. We also pioneered a globally unique rating service for Micro, Small and Medium Enterprises (MSMEs) and significantly extended the accessibility to rating services to a wider market. Over 95,000 MSMEs have been rated by us
